Value Hypothesis

- Determines if a customer wants the product

Value Hypothesis

- Determines if a customer wants the product
- Turns a value statement into a question:

Value Hypothesis

- Determines if a customer wants the product
- Turns a value statement into a question:
 - **Statement:** Customers use product X because they want to share their locations with others.

Value Hypothesis

- Determines if a customer wants the product
- Turns a value statement into a question:
 - **Statement:** Customers use product X because they want to share their locations with others.
 - **Question:** Do customers use product X because they want to share their locations with others?

Experimental Design

- Write down your value hypothesis (in a form of a questions)

Experimental Design

- Write down your value hypothesis (in a form of a questions)
- Write down questions, the answers to which will give you the information regarding the value hypothesis

Experimental Design

- Write down your value hypothesis (in a form of a questions)
- Write down questions, the answers to which will give you the information regarding the value hypothesis
 - More specific questions

Experimental Design

- Write down your value hypothesis (in a form of a questions)
- Write down questions, the answers to which will give you the information regarding the value hypothesis
 - More specific questions
 - 5-10 questions per value hypothesis

Homework 4 - Hypothesis Testing, Task 1

- Perform interview with 3-5 people
- In the document be sure to include:
 - Who are the people you spoke with
 - The questions you asked
 - The answers you received
 - Conclusions (are your hypotheses OK, is there anything you need to change?)

Homework 4 - Hypothesis Testing, Task 2

- Based on the conclusions from Task 1, fix/complete the prototype you have made to be ready for the usability testing
- (if possible) Include the link for the prototype
